

SNAPSHOT | Families Served By Home Visiting

An Opportunity Agenda for a Better Minnesota

Minnesota teenagers gave birth to 2,406 babies in 2015. These new parents often lack family support, high school diplomas, and parenting skills. Governor Dayton's budget would invest \$31 million in the Department of Health's highly effective Home Visiting Program, which helps young parents of at-risk children develop the skills they need to care for their children. The proposal also will improve access to evidence-based home visiting for all high-risk mothers by increasing Medical Assistance payments for these services. See below how Minnesota families with at-risk children would benefit all across the state.
